

# LinkedIn Top Skills For 2016

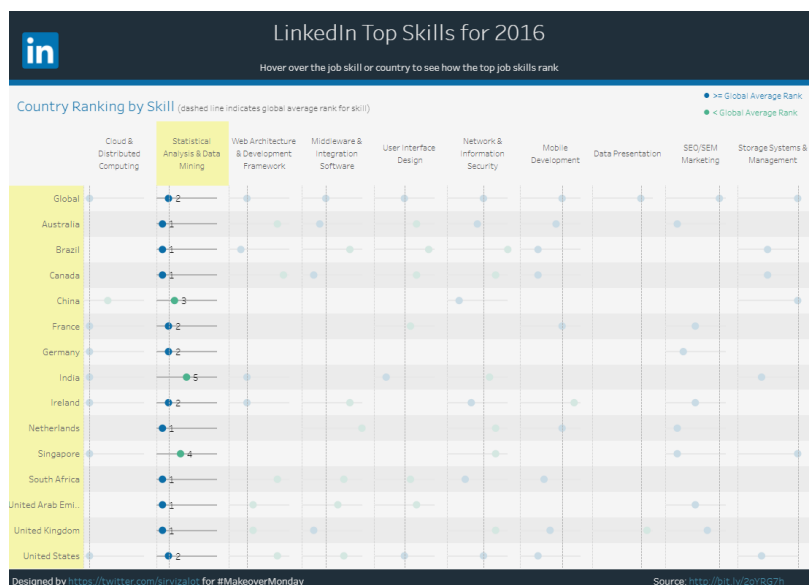

## Observation 1:

The top skill ranked globally is **Cloud & Distributed Computing**, we have 7 countries which have this skill. 6 countries are skilled in **Cloud & Distributed Computing** and also are meeting the global rank which are (France, Germany, India, Ireland, Singapore, United State), only one country has gotten less than the global average rank which is **China**, as you can see in the statistic visualization of [LinkedIn Top Skills For 2016](#) by pointing on **Cloud & Distributed Computing**.

## Observation 2:

One of the most popular skills is **Statistical Analysis & Data Mining**. The top skilled countries in **Statistical Analysis & Data Mining** are: (Australia, Brazil, Canada, Netherlands, South Africa, United Arab Emirates, United Kingdom). Other four countries are meeting the global rank which are (France, Germany, Ireland, United State). The last three countries have gotten less than the global average listed

from the best (China, Singapore, India). All of this information I found it from statistic visualization of [LinkedIn Top Skills For 2016](#) by pointing on [Statistical Analysis & Data Mining](#).

### Observation 3:

One of the rarest top skills in 2016 is [Data Presentation](#), Although Its ranked globally eighth. the reason why it's the rarest skill is because there's only one country which has this skill; The United Kingdom, it comes in rank 9 which is less than the global rank. All infos that I got is from statistic visualization of [LinkedIn Top Skills For 2016](#) by pointing on [Data Presentation](#).
